

Easy Care & Maintenance

For daily maintenance, simply wash DIFINITI countertops and flooring with a soft cotton cloth and warm water. Mild soap may also be used if desired. For occasional deep cleaning, use any nonabrasive liquid cleaner with bleach. We recommend Clorox Clean-Up[®] cleaner with bleach; it's that easy to clean and maintain DIFINITI.

Things to Avoid

Several chemicals on the market are corrosive to and may attack quartz surfaces. The potential damage these chemicals can cause is often irreversible. Take the precautions listed below when caring for your DIFINITI quartz surfaces.

Do not expose your DIFINITI surfaces to oven cleaners, abrasive cleaners, battery acid, paint removers, furniture strippers, metal cleaners or similar products.

DIFINITI is not heat proof, chemical proof or fracture proof. By exercising common sense protections, the beauty of your DIFINITI quartz will last throughout the years.

Never use abrasive or harsh scrub pads on your DIFINITI surfaces as these can permanently scratch and dull the surface.

Do not apply sealers, penetrants or topical treatments to DIFINITI, as these products are not needed and may dull or give the appearance of inconsistent polish.
